**Subject:** Your proposal

Your proposed settlement for the Microsoft case is embarrassing to say the least. I cant help but worry about the future of real competition in the U.S. I keep hoping that some one I your office will raise a voice to say how wrong this agreement is. Microsoft is stifling competition. Microsoft is hindering if not completely preventing innovation, unless it fills its own wallets. I am really hoping that the court sees that this agreement in not in the best interest of any one except for Microsoft. This agreement does nothing to punish Microsoft or for that matter hinder its ability to prevent any competition in anything that Microsoft might have a hand in. This agreement is an embarrassment. Its no agreement at all, its just a license for Microsoft to continue to do everything it has been doing with out any thing being done. Its as if this whole case was for nothing. And at then end Microsoft will continue to do what it have always been able to do. Kill innovation. What this agreement is saying, is that innovation can only come from Microsoft.

I will write to as many people as I can to fight against this agreement. I Believe it is wrong for the Long tem economy, it is wrong for the tech sector, it is wrong for the common user, and it is wrong for America.
